EXPERIENCE

PT. Mitra Integrasi Informatika

Application Developer Jr (On-site at BNI - Bank Negara Indonesia) Mar 2026 - Present

- Assist in designing and structuring database tables, particularly for master data management
- Develop and organize table schemas to ensure data consistency and scalability
- Collaborate with team members to align database structure with application requirements

PT. Dazo Kreatif Indonesia

Lead Engineer May 2025 - Feb 2026

- Restructured and optimized the WhatsApp backend engine architecture, consolidating ~30 separate PM2 instances into a single centralized instance; successfully resolved critical server overload issues (eliminating 100% resource spikes) and drastically reduced CPU and RAM consumption.
- Designed and automated CI/CD pipelines using GitHub Actions to deploy the restructured architecture to AWS infrastructure, accelerating the deployment workflow while ensuring high runtime stability.
- Led and managed a cross-functional team of 4 developers, coordinating task allocations and driving collaboration to ensure timely product releases.
- Identified, analyzed, and resolved critical, medium, and minor production bugs swiftly to maintain the stability, scalability, and performance of backend services built on Golang (Fiber), Laravel (Inertia Vue.js), and Express.js.
- Developed and modernized landing pages using Next.js, implementing performance optimization and SEO strategies that successfully enhanced page loading speeds and search engine visibility.

PT. Dazo Kreatif Indonesia

Full Stack Developer Oct 2024 - May 2025

- Architected and built an AI Chatbot system seamlessly integrated with the internal Order Management System (OMS) utilizing Express.js, OpenAI, and LangChain.
- Implemented FAISS Vector Database to enable accurate semantic search and robust knowledge-base capabilities, leveraging Tools and Multi-Agent concepts to automate complex workflows.
- Developed and integrated modular API services across diverse tech stacks, ensuring seamless data synchronization between Node.js and Golang-based microservices.

Education & Corporate Applications

Full Stack Developer (Project-Based) Feb 2024 - Jun 2024

- Developed a B2B web system to digitalize enterprise operations, covering inventory management, financial transactions, automated reporting, and real-time logistics tracking across Admin, Supplier, and Outlet roles.
- Designed complex relational databases and implemented strict validation logic for accurate digital stock opname using Laravel and Vue.js (SPA).
- Built an AI-powered chatbot platform to automate school information access for students and parents, including Admin and Principal monitoring dashboards.
- Implemented a hybrid AI architecture combining LSTM-based intent classification and NLP, with frontend built in Vue.js (SPA) and backend using Laravel and Python.

Universitas Islam Negeri Sultan Syarif Kasim Riau

Assistant Lecture for Mobile Programming Feb 2024 - Jun 2024

- Teaches how to creating a simple mobile application, how to implement a design into a mobile application and teaches the background process running a mobile application.

Incubator Faculty of Science and Technology UIN Suska

Internship Programmer Jan 2023 - Apr 2023

- Make an AI-Quran bot from chatbot telegram using framework laravel. The AI-Quran bot can give us information about AI-Quran such as translation, audio, and tafseer from many sources.

Universitas Islam Negeri Sultan Syarif Kasim Riau

Computer Lab Assistant Aug 2022 - Jan 2023

- Provide technical assistance to students or laboratory users in resolving hardware and software problems.
- Supervise the use of the laboratory, ensure the safety and orderliness of the room, and ensure that the rules for using the laboratory are followed.
- Collaborate with teaching staff to develop technology-related learning materials in a computer laboratory context.
- Create and maintain documentation related to hardware and software inventory, as well as repair and maintenance records.
- Ensure that software required for lessons or research is available and functioning properly on all laboratory computers.

EDUCATION

Universitas Islam Negeri Sultan Syarif Kasim Riau

Bachelor of Engineering, Informatics Engineering Oct 2020 - May 2024

During my studies, I focused on web development and artificial intelligence, with several practical projects involving the implementation of modern technology. I recently completed research titled "Implementation of a Question Answering System for Tafsir Al-Azhar using Langchain and Large Language Model Based on Telegram Chatbot."

SKILL

Technical : JavaScript, PHP, Python, Java, Laravel, Bootstrap, Tailwind, MySQL, Linux, Golang, Vue, Node Js, Open AI, Langchain, RESTful API, React, Next JS, Express

Soft Skills : Team Work, Analyze, Communication, Problem Solving

Language : Indonesia,
